

Cron Job: Merton Daily Brief - Email + Discord (FAILED)

```
*Job ID:** 90e0a8c3b0c8
*Run Time:** 2026-05-31 12:23:34
*Schedule:** 45 7 * * *
```

Prompt

[IMPORTANT: The user has invoked the "merton-daily-brief" skill, indicating they want you to follow its instructions. The full skill content is loaded below.]

```
--
name: merton-daily-brief
description: "Merton Daily Brief - Generate and send the daily macro/fx/geopolitical brief to Yanis AND Rémi via email + Discord. Runs every morning at 7:45 AM CET."
metadata:
hermes:
tags: [Daily Brief, Macro, FX, Geopolitics, Email, PDF, Trading]
--
```

Merton Daily Brief

Generate a comprehensive brief covering macroeconomics, FX, geopolitics, and commodities. Send it to Yanis AND Rémi via email (text + PDF) and post to Discord #rapport.

*Two report types based on day of week:**

Monday-Saturday: Classic Daily Brief (11 sections, synthetic)

Sunday: Weekly Macro·Micro·Géopo Brief (8 parts, deep research, most important report of the week)

Schedule

GitHub push script - no French PDFs: The `push-macro-reports.sh` script now ONLY copies English PDFs (`\_en.pdf`). It will NEVER fall back to French PDFs. If the English PDF doesn't exist, the report is skipped. Always generate `\_en.md` ? `\_en.pdf` before running the push script. See Step 6.

HTTP 429 Rate Limit on cron: The daily brief cron can fail with `RuntimeError: HTTP 429: Provider returned error` when OpenRouter rate-limits requests. This typically happens when multiple crons run close together or the prompt is too large. If the cron fails, manually trigger it via `cronjob(action='run', job\_id='90e0a8c3b0c8')` after waiting 5-10 minutes. To prevent: keep the prompt compact, ensure 30+ min gap between crons, and configure a fallback provider in Hermes config.

References

```
`references/sources.md` - Complete prioritized list of web sources (URLs, notes)
`references/technical-reference.md` - fpdf2 API quirks, email config, cron job details, file paths
`references/research-stack.md` - What actually works: Yahoo Finance API commands, Trading Economics curl patterns, RSS feed URLs, CNBC headline scraping, and what tools DON'T exist in this environment
`references/format-examples.md` - Validated format examples (19 Mai 2026): Discord emoji lists, Email HTML, content depth requirements. Reference for the gold standard.
`references/github-setup.md` - GitHub repo setup: repo URL, auth, push script path, English-only rules, translation workflow, file naming.
`references/known-failures.md` - Confirmed non-working sources & tools: Trading Economics (auth wall), CNBC (JS shell), Financial Juice (JS), AP/Reuters (JS), Wolf Street (no headlines), plus cron-specific failures (HTTP 429, memory tool). Check this file before trying a new source to avoid wasting time.
```

Pitfalls

fpdf2 v2.8 API changed: No `uni=True` param in `add\_font()`, use `auto=True` not `auto\_page\_break=True` in `set\_auto\_page\_break()`, use `new\_x`/`new\_y` instead of `ln` in `cell()`. See `references/technical-reference.md`.

No DejaVu Oblique: System only has DejaVuSans and DejaVuSans-Bold. Use Bold for emphasis.

No pip in system Python: Python 3.14 has no pip module. Use `uv` for Python package management.

No sudo: Cannot install system packages interactively.

Discord length: No artificial character limit. If the brief exceeds 2000 chars, split into 2-3 sequential messages. Never delete analysis to fit a limit. The Discord version must contain 90% of the full brief's value.

Email must be HTML (with `.md` fallback): Always attempt to generate a proper HTML email first - use proper `

` tags with the color scheme defined in Step 4. Save as `.html` and pass to the send script. <b>HOWEVER</b> , if the markdown-to-HTML conversion fails (e.g., regex errors with emoji patterns, escaping issues), fall back to sending the `.md` file directly - the email script auto-detects format and sends with correct MIME type. An imperfect email delivered is always better than a perfect email that never sends. Do NOT spend more than 2 attempts on HTML generation.
--

Investing.com calendar curl returns JS shell: As of May 2026, `curl` on Investing.com economic calendar returns a JS-rendered shell with no event data. Do not waste time trying to parse it. Rely on CNBC headlines for today's data mentions and Yahoo Finance API for prices.

Content depth is mandatory: The brief must be 150-250 lines minimum. Every section needs full analysis - not bullet-point summaries. Macro needs 4-8 substantive bullets per zone. Merton's Take needs 8-12 lines. Consensus vs Réalité needs 5-7 market assumptions + 3-5 trade ideas. Never truncate to fit a format.

Email credentials: Stored in the send script. Do not log or expose them.

`web` tool does NOT exist: The `web` tool (web_search, web_extract) is not available in this environment. Do NOT use it or let subagents use it. Use the research stack below instead.

Merton venv may not exist: If `/home/wilfr/.hermes/venvs/merton/bin/python3` is not found, create it:

```

```bash
uv venv /home/wilfr/.hermes/venvs/merton
uv pip install fpdf2 defusedxml fonttools pillow --python /home/wilfr/.hermes/venvs/merton/bin/python3
```

```

GitHub repo may not be cloned: If `push-macro-reports.sh` fails with "No such file or directory" for `github-macro-reports`, clone first:

```

```bash
git clone https://github.com/Wilfrid-art/merton-macro-reports.git
/home/wilfr/.hermes/reports/github-macro-reports
```

```

`send\_message` tool: Available and works from the main/interactive session for Discord posting (`target='discord'`). NOT available inside cron job sessions. Do NOT use `send\_message` from cron context - it silently fails. From the main session, prefer `send\_message` over the `discord` tool for posting brief content to channels.

CNBC section pages DO work for headlines: Despite previous documentation, CNBC section pages (World, Fed, Markets, Economy, Housing) return usable headlines via curl. Use `re.findall(r'<h3[^>]\*>.\*?<a[^\>]\*>([^\<]+)</a>', html)` or Card-title class patterns.

Trading Economics remains behind auth wall: All Trading Economics pages return JS auth walls. Do not waste time on them. Use Yahoo Finance API for prices and RSS feeds for narrative.

ddgs CLI not installed: The `ddgs` CLI is not available. Do not attempt `ddgs text` or similar commands.

CNBC/FT/Reuters are JS-rendered SPAs: curl gets only the shell (no article content). Use RSS feeds and Yahoo Finance API instead.

delegate_task subagents cannot use `web` tool: When spawning subagents for research, be aware they also lack the `web` tool. Give them explicit curl/Yahoo Finance API instructions instead.

GitHub is English-only: All content pushed to GitHub must be in English. No French, no personal names, no internal tool mentions. See `references/github-setup.md`.

AP News / Reuters homepages don't work with curl: Like CNBC/FT, these are JS-rendered SPAs. curl gets only the shell. Use their RSS feeds or skip them. Do not waste time trying to parse headlines from these homepages.

execute_code sandbox needs explicit imports: Each `execute\_code` call runs in a fresh Python sandbox. Always include `import json`, `import re`, `import subprocess` etc. at the top of every script, even if you think they're "obvious". Forgetting `import json` is the most common error.

GitHub push script - no French PDFs: The `push-macro-reports.sh` script now ONLY copies English

PDFs (`\_en.pdf`). It will NEVER fall back to French PDFs. If the English PDF doesn't exist, the report is skipped. Always generate `\_en.md` ? `\_en.pdf` before running the push script. See Step 6.

HTTP 429 Rate Limit on cron: The daily brief cron can fail with `RuntimeError: HTTP 429: Provider returned error` when OpenRouter rate-limits requests. This typically happens when multiple crons run close together or the prompt is too large. If the cron fails, manually trigger it via `cronjob(action='run', job\_id='90e0a8c3b0c8')` after waiting 5-10 minutes. To prevent: keep the prompt compact, ensure 30+ min gap between crons, and configure a fallback provider in Hermes config.

Always use `--also-remi` flag: The daily brief AND weekly brief must ALWAYS be sent to both Yanis (yanis.blanco2010@gmail.com) AND Rémi (remi.blanco@amstein-walthert.ch). The `merton\_send\_email.py` script supports `--also-remi` which auto-sends to Rémi with a personalized intro. Never run the email script without this flag. If you change the email sending logic, ensure Rémi is never dropped.

Cron may stall mid-`execute\_code` - The cron job can fail with "Stream stalled mid tool-call (execute_code); the action was not executed" even WITHOUT an HTTP 429. This is a different failure mode from rate limiting - it's a stream timeout. If this happens: (1) do NOT retry the cron immediately, (2) manually execute the brief steps in the main session instead, (3) the brief `.md` file may already exist from the partial run - check `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.md` first and verify it has all 11 sections before regenerating from scratch.

Check for existing brief before regenerating - Before running research + writing, check if `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.md` already exists (e.g., from a partial cron run). If it does, read it and verify it has all 11 sections and is 150-250 lines. If complete, skip to PDF generation. If incomplete, edit/extend it rather than rewriting.

`send\_message` works from main session (not cron) - The `send\_message` tool IS available and works correctly from the main/interactive session. The earlier pitclaim that it "does NOT exist" is incorrect for the main session context. It is only unavailable inside cron job sessions. From the main session, use `send\_message(target='discord', message=...)` to post to Discord. Split into 3 messages: Msg1 = Headline + Sentiment + Macro (~2000 chars), Msg2 = Géopolitique + FX + Commodités + Agenda (~2000 chars), Msg3 = Thème macro + Consensus vs Réalité + Merton's Take (~2000 chars).

Email works with `.md` body as fallback - If HTML email generation fails (e.g., regex errors in the markdown-to-HTML conversion), the `merton\_send\_email.py` script CAN accept a `.md` file as the body. It auto-detects format. The result is less visually polished (no colors/tables) but delivers the content. Generating a proper HTML email is preferred, but sending `.md` is always better than not sending.

FT/Bloomberg RSS feeds via curl return empty - As of late May 2026, `curl` on FT and Bloomberg RSS URLs returns 0 items even with proper User-Agent. Do NOT waste time retrying these in a loop. Use CNBC section pages (World, Fed, Markets, Oil, Gold, Economy) via curl as the primary news source - they consistently return h3 headlines. Also use Yahoo Finance API for price data.

Workflow

Step 0: Determine Report Type

```
```python
from datetime import datetime
is_sunday = (datetime.now().weekday() == 6)
```
```

Monday-Saturday ? Classic Daily Brief (Steps 1-6 below)

Sunday ? Weekly Macro·Micro·Géopo Brief (see "Sunday Weekly Brief" section below)

--

Classic Daily Brief (Monday-Saturday)

*RESEARCH STACK - What actually works in this environment:**

1. **Yahoo Finance API** (PRIMARY - real-time prices):

```
```bash
```

```
curl -sL "https://query1.finance.yahoo.com/v8/finance/chart/%5EGSPC?range=5d&interval=1d" -H
"User-Agent: Mozilla/5.0" | python3 -c "import sys,json; d=json.load(sys.stdin); r=d['chart']['result'][0];
print(r['meta']['regularMarketPrice'])"
```

Tickers: `^GSPC` (S&P), `^VIX`, `GC=F` (Gold), `CL=F` (WTI), `BZ=F` (Brent), `EURUSD=X`,  
`GBPUSD=X`, `JPY=X`, `CHF=X`, `BTC-USD`, `HG=F` (Copper), `SI=F` (Silver), `^TNX` (10Y), `^TYX`  
(30Y), `^FVX` (5Y), `^IXIC` (NASDAQ), `DX-Y.NYB` (DXY)

## 2. **Investing.com Economic Calendar** (PRIMARY calendar source - RELIABLE):

```
```bash
curl -sL "https://www.investing.com/economic-calendar/" -H "User-Agent: Mozilla/5.0 (Windows NT 10.0;
Win64; x64) AppleWebKit/537.36 (KHTML, like Gecko) Chrome/120.0.0.0 Safari/537.36"
```

Parse with `re.sub(r'<[^>]+>', ' ', html)` then search for day names and extract events with
Actual/Consensus/Previous values. Works reliably when Trading Economics is behind auth wall and
ForexFactory has Cloudflare challenges.

3. **RSS Feeds** (news headlines - these work):

FT: `https://www.ft.com/rss/home` and `https://www.ft.com/rss/markets`
Bloomberg: `https://feeds.bloomberg.com/markets/news.rss` and
`https://feeds.bloomberg.com/economics/news.rss`
Bloomberg Politics: `https://feeds.bloomberg.com/politics/news.rss`

4. **CNBC headlines** (partial - get headlines only, not article body):

```
```bash
curl -sL "https://www.cnn.com/world/?region=world" -H "User-Agent: Mozilla/5.0" | python3 -c "...extract
h3 headlines..."
curl -sL "https://www.cnn.com/federal-reserve/" -H "User-Agent: Mozilla/5.0"
curl -sL "https://www.cnn.com/oil/" -H "User-Agent: Mozilla/5.0"
curl -sL "https://www.cnn.com/gold/" -H "User-Agent: Mozilla/5.0"
```

\*What does NOT work:\*\*

`web` tool (doesn't exist)  
`web\_search` tool (doesn't exist)  
`ddgs` CLI (not installed)  
curl on CNBC/FT/Reuters article pages (JS-rendered SPAs, only get nav shell)  
`himalaya` for composing emails (use the send script instead)  
Trading Economics (behind auth wall - do not waste time)  
ForexFactory (Cloudflare challenge - use Investing.com instead)  
`discord` tool (does NOT exist in cron environment - skip Discord posting silently)

Navigate the web to gather today's data using the research stack above.

\*Two-pass approach - BOTH are mandatory:\*\*

\*Pass 1: Yanis's sources\*\* (priority order, full list with URLs in `references/sources.md`):

1. Financial Juice Daily Dose - read FIRST for overnight sentiment
2. ING FX Daily (Chris Turner) - #1 FX source
3. Trading Economics - raw macro data (USE CURL, works perfectly)
4. ForexLive - breaking FX news
5. Bloomberg / Reuters / FT - financial media (USE RSS FEEDS)
6. ZeroHedge, Wolf Street - alternative views
7. Geopolitical sources as needed
8. Oilprice.com, EIA - energy
9. ForexFactory - economic calendar

\*Pass 2: Recherche autonome complémentaire\*\* - Après avoir parcouru les sources de Yanis, fouille  
ailleurs pour ne rien rater :

Yahoo Finance API pour les données de marché actualisées  
RSS feeds FT/Bloomberg pour les breaking news  
Trading Economics pour les données macro  
CNBC headlines pour le sentiment  
Polymarket pour les mouvements de probabilité sur les événements en cours

arXiv / SSRN si un paper académique pertinent est sorti  
 Tout autre source qui semble pertinente en fonction de l'actualité

L'objectif : si quelque chose d'important bouge quelque part, tu le trouves - même si ce n'est pas dans les sources de Yanis.

**\*Key data points to collect:\***

VIX, DXY, Gold, US 10Y, S&P 500 futures, WTI, BTC  
 Today's economic calendar (time CET, event, consensus, previous)  
 FX rates (EUR/USD, GBP/USD, USD/JPY, USD/CHF)  
 Overnight sentiment (Asia session, China data)  
 Geopolitical headlines  
 Fed speakers / central bank events

### Step 2: Generate the Brief

Write the brief following the EXACT format below. **DEPTH IS MANDATORY - every section must be fully developed with real analysis, not bullet-point summaries.**

The brief must contain ALL 11 sections in this order:

#### 1. Headline du Jour

3-5 lines MAX, punchy and factual  
 What moved, why it matters, what to watch  
 Include key numbers (prices, percentages, levels)

#### 2. Sentiment Global

Table with ALL key indicators: VIX, DXY, Gold, US 10Y, US 30Y, S&P 500, NASDAQ, WTI, Brent, BTC, Copper, Silver

Include Fear & Greed Index if available

**Add a 2-3 line "Lecture" paragraph** interpreting the overall signal (not just listing numbers)  
 Explain paradoxes (e.g., "gold correcting despite geopolitical tension because...")

#### 3. Macro - Ce qui a bougé

**Each zone (US, EU, China, UK, EM) must have 4-8 substantive bullet points**

Include specific data points with numbers, comparisons to consensus, and context  
 Don't just list events - explain what they mean and why they matter  
 Include central bank commentary, political developments, economic surprises

**This section should be the longest and most detailed** (40-60% of the brief)

#### 4. Géopolitique

Three sub-sections: Chaud, À surveiller, Positif  
 Each item must be a full sentence with context, not just a headline  
 Explain implications for markets

#### 5. FX Focus

Table with EUR/USD, GBP/USD, USD/JPY, USD/CHF (level + variation)

**Add a 3-5 line "Analyse" paragraph** explaining the FX dynamics  
 Identify the pair to watch with specific levels and catalysts  
 Explain drivers (rate differentials, risk sentiment, political factors)

#### 6. Commodités

Sub-sections: Pétrole, Or, Argent/Cuivre, Soft  
 Each with specific prices, variations, and **analysis of why**  
 Explain divergences (e.g., "oil up but gold down because...")  
 Include analyst targets and institutional views when available

#### 7. Agenda du Jour

Table with time (CET), country, event, consensus, previous, impact  
 Include the full week's key events below the daily table  
 Mark central bank decisions and high-impact releases

#### 8. Thème macro profond du jour

**This is a 5-10 line analytical essay** - not a bullet list  
 Identify the dominant macro narrative and explain it  
 Challenge the consensus view  
 Explain the "why now" and what could change it  
 This is where you demonstrate real understanding

## #### 9. Consensus vs Réalité - L'ALPHA

**Two sub-sections, both mandatory:**

**"Ce que le marché pricing"** - 5-7 specific market assumptions with // verdicts and explanations

**"L'alpha"** - 3-5 specific trade ideas with thesis, direction, and invalidation levels

This is the most valuable section - be bold and specific

Include concrete entry/exit levels where possible

## #### 10. Merton's Take

**Minimum 8-12 lines of developed analysis**

Start with the big picture: what regime are we in?

Identify the key driver of the week

State your conviction clearly

Explain the trade of the week with specific levels

End with explicit positioning (what to hold, what to avoid)

This is your opportunity to add unique value - be opinionated

## #### 11. Sources consultées

List ALL sources actually consulted (not just a template)

Include: Yahoo Finance API, specific RSS feeds read, specific CNBC pages, Trading Economics, etc.

**\*Rules:\*\***

Always navigate the web FIRST. Never rely on memory alone.

If a source is unavailable, skip to the next one.

**Every line must have value. No filler. No placeholders.**

The "Consensus vs Réalité" and "Merton's Take" sections are the most important - this is where you add real alpha.

**Do NOT include "Sources consultées" in the email body.** Keep the email clean - only the brief content. Sources go in the footer only.

Use current data (today's prices, today's events).

**The full brief should be 150-250 lines minimum.** Length is not a problem - completeness is.

**Never truncate analysis to fit a format.** If a section needs 15 lines, write 15 lines.

Save the brief as markdown to: `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.md`

## ### Step 3: Generate PDF

Run the PDF generation script:

```
```bash
/home/wilfr/.hermes/venvs/merton/bin/python3 \
/home/wilfr/.hermes/scripts/merton_generate_pdf.py \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief.md \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief.pdf
```
```

## ### Step 4: Send Email

Send the brief as **HTML email** (not plain text or Markdown) with PDF attachment to Yanis.

**\*Email subject format:\*\*** `Brief [Date] - [headline en 5 mots max]`

Example: `Brief 19 Mai - Pétrole explose, Fed mercredi`

**\*Email HTML Requirements (MANDATORY):\*\***

1. **Real HTML format** - Use proper `

|                                  |
|----------------------------------|
| ` tags. Never send raw Markdown. |
|----------------------------------|

2. **Professional design:**

Font: Arial or Georgia, 14px minimum

Max width 650px, centered

White background, black/dark grey text

Sections separated by colored dividers

Header: "MERTON DAILY BRIEF" in large text, date below

3. **Color scheme:**

Red (#e74c3c) for negative / risk-off signals

Green (#27ae60) for positive signals

Orange (#f39c12) for neutral / watch

Blue (#2980b9) for section titles

Grey (#7f8c8d) for secondary info

4. **HTML tables:**

Light borders (#ddd)  
 Alternating row colors (white / #f9f9f9)  
 Dark blue header (#2c3e50) with white text  
 Positive numbers in green, negative in red

## 5. Email structure:

1. Header ? "MERTON DAILY BRIEF - [date]"
2. Headline du jour ? colored box that stands out
3. Sections in order with clickable titles
4. Merton's Take ? special highlighted box
5. Footer - sources + generation date/time
6. **Do NOT include "Sources consultées" in the email body** - keep it clean. Sources go in the footer only.

**\*Generate the HTML email body\*** and save it alongside the markdown brief, then send:

```
```bash
/home/wilfr/.hermes/hermes-agent/venv/bin/python3 \
/home/wilfr/.hermes/scripts/merton_send_email.py \
yanis.blanco2010@gmail.com \
" Brief [Date] - [headline]" \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief.html \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief.pdf \
--also-remi
```
```

**\*IMPORTANT:\*** The `--also-remi` flag is MANDATORY. This sends the same brief to Rémi (remi.blanco@amstein-walthert.ch) with a personalized intro from Yanis. Never omit this flag.

**\*Note:\*** The email script now accepts HTML files (`.html`) as the body. It auto-detects the format and sends with the correct MIME type (`text/html` vs `text/plain`).

## ### Step 5: Post to Discord

**\*When running from the main/interactive session\*** (not cron): Post the full brief to Discord using `send\_message(target='discord', message=...)`.

Split into 3 sequential messages to stay within Discord's ~2000 char practical limit:

**Message 1:** Headline + Sentiment Global + Macro (all zones)

**Message 2:** Géopolitique + FX Focus + Commodités + Agenda du Jour + Week ahead

**Message 3:** Thème macro profond + Consensus vs Réalité + Merton's Take + Sources footer

**\*When running from cron\*:** The `send\_message` tool is NOT available. Skip Discord posting silently and note "Discord posting skipped (tool unavailable in cron)". The user will post manually or it will be picked up in the next interactive session.

**\*Content requirements:\***

ALL 11 sections must appear in the Discord post

The analysis, insights, and depth must be preserved - just formatted for Discord readability

"Merton's Take" and "Consensus vs Réalité" must be FULLY developed (not truncated to 1-2 lines)

"Macro" must have substantive bullet points per zone (not just 1-liners)

"Thème macro profond" must be a real paragraph, not a single sentence

If the full brief exceeds 2000 chars, split into 2-3 sequential Discord messages

**\*The goal:\*** Someone reading the Discord version should get 90% of the value of the full brief. The email/PDF has 100%. Discord should never feel like a teaser - it's the same content, just formatted differently.

## #### Discord Formatting Rules (MANDATORY)

**\*1. NO Markdown tables\*** - Discord doesn't render them properly. Use structured lists with emojis instead:

```
```
| VIX | 18.43 | +0.27% |
VIX ? 18.43 (+0.27%) | Neutre
```
```

**\*2. Visual density\*** - One info per line. Add visual separators (``) between sections. Keep it airy.

\*3. Native Discord formatting:\*\*

**Bold** for key numbers and levels

`Code inline` for currency pairs and tickers (e.g. `EUR/USD`, `^VIX`)

Negative signal / risk-off

? Positive signal

? Neutral / watch

Urgent info or surprise of the day

\*4. Visual hierarchy (in this order):\*\*

1. **HEADLINE DU JOUR** ? 3-5 lines, punchy, with key numbers
2. **SENTIMENT GLOBAL** ? all indicators with "Lecture" paragraph
3. **MACRO** ? developed per zone (4-8 bullets each), with analysis
4. **GÉOPOLITIQUE** ? full sentences with context
5. **FX FOCUS** ? table + Analyse paragraph + pair to watch
6. **COMMODITÉS** ? each commodity with analysis
7. **AGENDA** ? full day + week overview
8. **THÈME MACRO PROFOND** ? full paragraph (5-8 lines)
9. **CONSENSUS VS RÉALITÉ** ? both sub-sections with all points
10. **MERTON'S TAKE** ? full analysis (8-12 lines), conviction, positioning
11. **SOURCES** ? compact list

\*5. Length ? **No artificial length limit. If it's 3000 chars of real content, post it across 2-3 messages.** Never delete analysis to fit a character limit.\*\*

\*6. Structure template:\*\*

``

**\*\*BRIEF - [Day] [Date] [Year]\*\***

---

## **HEADLINE DU JOUR**

[3-5 lines, key numbers]

---

## **SENTIMENT GLOBAL**

**\*\*VIX\*\* ? XX.XX (±X.X%) | Signal**

Sources : [sources]\*

Généré à HH:MM CET - Merton v2.0\*

### ### Step 6: Push to GitHub (English only)

After posting to Discord, push the report to the public GitHub repo. **All content on GitHub must be in English.**

**\*Process:\*\***

1. The brief is written in French for Discord/email (Yanis's language)
2. Before pushing, translate the full brief to English
3. Save the English version as `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief\_en.md`
4. Generate the English PDF:

```
```bash
/home/wilfr/.hermes/venvs/merton/bin/python3 \
/home/wilfr/.hermes/scripts/merton_generate_pdf.py \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief_en.md \
~/hermes/reports/daily-briefs/YYYY-MM-DD_brief_en.pdf
```
```

5. The README and all repo content is English-only

```
```bash
/home/wilfr/.hermes/scripts/push-macro-reports.sh
```
```

This script will:

Copy the English PDF (`\_en.pdf`) to the GitHub repo as `YYYY-MM-DD\_brief.pdf`

**NEVER copy French PDFs** - if no English PDF exists, the report is skipped

Update the README with the latest reports list

Commit and push to <https://github.com/Wilfrid-art/merton-macro-reports>

**\*Run this step AFTER the email and Discord post\*\*** - it's the final delivery step.

**\*CRITICAL:\*\*** The GitHub repo is public and English-only. No French content, no French PDFs, no mention of internal tools or personal names. Pure macro analysis. If the English PDF cannot be generated, skip the push rather than pushing French content.

### ## File Locations

**Markdown briefs:** `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.md`

**PDF briefs:** `~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.pdf`

**PDF generator:** `~/home/wilfr/.hermes/scripts/merton\_generate\_pdf.py`

**Email sender:** `~/home/wilfr/.hermes/scripts/merton\_send\_email.py`

**GitHub push:** `~/home/wilfr/.hermes/scripts/push-macro-reports.sh`

**Python (PDF):** `~/home/wilfr/.hermes/venvs/merton/bin/python3`

**Python (email):** `~/home/wilfr/.hermes/hermes-agent/venv/bin/python3`

### ## Email Config

**From:** Merton <merton.agency.dev@gmail.com>

**To (primary):** yanis.blanco2010@gmail.com

**To (also):** remi.blanco@amstein-walthert.ch (via --also-remi flag, with personalized intro)

**SMTP:** smtp.gmail.com:587 (STARTTLS)

### ## Error Handling

If PDF generation fails, send email without attachment and report the error

If email fails, still post to Discord and report the error

If web sources are down, use alternative sources from the list

Never skip the brief entirely - even partial data is better than nothing

--

### ### Sunday Weekly Macro·Micro·Géopo Brief

This is the most important report of the week. Invest the time to make it exceptional.

#### #### Research Phase - Use ALL available sources:

**\*RESEARCH STACK** (what works in this environment):\*\*

1. **Yahoo Finance API** - real-time prices for all assets (see Classic Brief for curl commands)

2. **Trading Economics** - economic calendar, macro data, country-specific data
3. **FT RSS** (`https://www.ft.com/rss/home`, `/rss/markets`) - market news, geopolitics, macro analysis
4. **Bloomberg RSS** (`https://feeds.bloomberg.com/markets/news.rss`, `/economics/news.rss`) - breaking news, economics
5. **CNBC headlines** - section pages (federal-reserve, oil, gold, world) for headline scraping
6. **AP News** - `https://apnews.com/hub/iran` and similar for geopolitical coverage
  - \*MACRO & DATA:\*\* FRED, TradingEconomics, BIS, IMF, Eurostat, BLS.gov, Census Bureau (use curl)
  - \*CENTRAL BANKS:\*\* federalreserve.gov, ecb.europa.eu, boj.or.jp, bankofengland.co.uk (use curl for speeches/statements)
  - \*MICRO & EARNINGS:\*\* Yahoo Finance API for price data, Earnings Whispers, SeekingAlpha (curl)
  - \*GEOPOLITICS:\*\* FT RSS, Bloomberg RSS, CNBC headlines, AP News, Foreign Affairs, CFR
  - \*SENTIMENT & FLOWS:\*\* CFTC COT Reports, CNN Fear & Greed, AII Sentiment Survey
  - \*COMMODITIES:\*\* Yahoo Finance API (GC=F, CL=F, BZ=F, HG=F, SI=F), EIA, LME
  - \*CREDIT & RATES:\*\* Yahoo Finance API (^TNX, ^TYX, ^FVX), FRED yield curves
  - \*CALENDAR:\*\* Trading Economics (curl - works perfectly), ForexFactory
  - \*RESEARCH:\*\* Project Syndicate, VoxEU, Brookings Institution, Peterson Institute

Start with Yahoo Finance API for market data, then RSS feeds for news narrative, then Trading Economics for calendar. Do NOT use `web` tool or `ddgs` CLI - they don't exist in this environment.

#### Report Structure (8 parts):

1. **PARTIE 1 - MACRO GLOBALE** (Central Banks, US Macro, Europe, China/Asia, Commodities, Dollar/FX)
2. **PARTIE 2 - MICRO & MARCHÉS** (Earnings Season, Sectors & Rotations, Valuations & Sentiment, Credit & Bonds)
3. **PARTIE 3 - GÉOPOLITIQUE** (Active Conflicts, Trade & Sanctions, Domestic Politics, Tail-Risk)
4. **PARTIE 4 - CALENDRIER COMPLET DE LA SEMAINE** (Economic releases, central bank speeches, geopolitical events)
5. **PARTIE 5 - THESIS & CONNEXIONS** (Non-obvious connections, weekly macro thesis, what could change everything)
6. **PARTIE 6 - IDÉES DE PLAYS** (Macro-driven plays, geopolitical plays, event-driven plays, play of the week)
7. **PARTIE 7 - RISQUES & VIGILANCE** (Bullish risks, bearish risks)
8. **PARTIE 8 - INSIGHT DE LA SEMAINE** (Most original analysis, the connection nobody else is making)

#### Critical Rules:

NEVER use placeholders. Every section must contain REAL, CURRENT data.

Scrape actual sources. Use web\_search extensively.

For the calendar section, use ForexFactory or Investing.com for the ACTUAL upcoming week's events.

For earnings, use Earnings Whispers or SeekingAlpha for the ACTUAL upcoming week's earnings.

Be bold in your thesis. Take a clear position.

The "Connexions Non-Évidente" and "Insight de la Semaine" sections are where you add the most value.

#### Delivery:

1. Save markdown to: `~/hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md`
2. Generate PDF: `/home/wilfr/.hermes/venvs/merton/bin/python3 /home/wilfr/.hermes/scripts/merton\_generate\_pdf.py ~/hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md ~/hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.pdf`
3. Send email: `/home/wilfr/.hermes/hermes-agent/venv/bin/python3 /home/wilfr/.hermes/scripts/merton\_send\_email.py yanis.blanco2010@gmail.com " Weekly Macro·Micro·Géopo Brief - [date]" ~/hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md ~/hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.pdf --also-remi`
4. Post FULL report to Discord #rapport (split into multiple messages if needed - it will be long, that's expected)
5. Push to GitHub: `/home/wilfr/.hermes/scripts/push-macro-reports.sh`

The user has provided the following instruction alongside the skill invocation: [IMPORTANT: You are running as a scheduled cron job. DELIVERY: Your final response will be automatically delivered to the user - do NOT use send\_message or try to deliver the output yourself. Just produce your report/output as your

final response and the system handles the rest. SILENT: If there is genuinely nothing new to report, respond with exactly "[SILENT]" (nothing else) to suppress delivery. Never combine [SILENT] with content - either report your findings normally, or say [SILENT] and nothing more.]

Generate today's Merton report and deliver it to Yanis.

## ## Step 0: Determine Report Type

Run this Python check FIRST:

```
```python
from datetime import datetime
today = datetime.now()
weekday = today.weekday() # 0=Monday, 6=Sunday
is_sunday = (weekday == 6)
```
```

\*If is\_sunday = False (Monday-Saturday):\*\* ? Generate the CLASSIC DAILY BRIEF (see Step A below)

\*If is\_sunday = True (Sunday):\*\* ? Generate the WEEKLY MACRO·MICRO·GÉOPO BRIEF (see Step B below)

--

## ## Step A: Classic Daily Brief (Monday-Saturday)

Follow the merton-daily-brief skill instructions:

1. Collect fresh data (two-pass: Yanis's sources then autonomous research)
2. Generate the brief in the standard daily format (11 sections)
3. Save markdown to ~/hermes/reports/daily-briefs/YYYY-MM-DD\_brief.md
4. Generate PDF via /home/wilfr/.hermes/venvs/merton/bin/python3 /home/wilfr/.hermes/scripts/merton\_generate\_pdf.py
5. Send email to yanis.blanco2010@gmail.com with PDF attachment via /home/wilfr/.hermes/hermes-agent/venv/bin/python3 /home/wilfr/.hermes/scripts/merton\_send\_email.py
6. Post condensed version to Discord #rapport (under 2000 chars)

--

## ## Step B: Weekly Macro·Micro·Géopo Brief (Sunday ONLY)

This is the most important report of the week. It must be comprehensive, deeply researched, and contain REAL data - no placeholders.

### ### Research Phase - Use ALL available sources:

\*MACRO & DATA:\*\* FRED, TradingEconomics, BIS, IMF, Eurostat, BLS.gov, Census Bureau

\*CENTRAL BANKS:\*\* federalreserve.gov, ecb.europa.eu, boj.or.jp, bankofengland.co.uk, FOMC/ECB

transcripts

\*MICRO & EARNINGS:\*\* Earnings Whispers, SeekingAlpha, FactSet Earnings Insight, Bloomberg

Intelligence

\*GEOPOLITICS:\*\* Foreign Affairs, CFR, Stratfor, ISW, RAND Corporation, Reuters World, AP Diplomacy

\*SENTIMENT & FLOWS:\*\* CFTC COT Reports, CNN Fear & Greed, AII Sentiment Survey, BofA Fund

Manager Survey

\*COMMODITIES:\*\* EIA Weekly Petroleum, USDA WASDE, LME, CME Group

\*CREDIT & RATES:\*\* FRED yield curves, ICE BofA HY Index, Bloomberg Credit spreads

\*CALENDAR:\*\* ForexFactory, Investing.com Economic Calendar, Earnings Whispers

\*RESEARCH:\*\* Project Syndicate, VoxEU, Brookings Institution, Peterson Institute

Start with web\_search on the most important topics of the week, then deep-dive into specific sources as needed.

### ### Generate the report following this EXACT structure:

--

# WEEKLY MACRO · MICRO · GÉOPO BRIEF

## Semaine du [lundi date] au [vendredi date]

Généré le dimanche [date] à [heure] par Merton\*

Sources : ensemble des sources disponibles\*

--

**# PARTIE 1 - MACRO GLOBALE****## 1.1 BANQUES CENTRALES & POLITIQUE MONÉTAIRE****### Federal Reserve (USD)**

[Dernière décision et date. Prochaine réunion FOMC. Derniers discours des membres du FOMC - qui dit quoi ? Quelle est la probabilité réelle de move selon les fed funds futures ? Quel est le vrai message derrière la communication officielle ? Y a-t-il des dissensions internes ? Comment le marché interprète-t-il la posture actuelle ?]

**### Banque Centrale Européenne (EUR)**

[Même profondeur d'analyse. Dernière décision, prochaine réunion, discours récents de Lagarde et des membres du Conseil. Divergence ou convergence avec la Fed ? Qu'est-ce que ça implique pour l'EUR/USD ? Les économies périphériques (Italie, Espagne) créent-elles des tensions internes ?]

**### Bank of Japan (JPY)**

[La BOJ reste l'outlier global. Où en est le YCC ? Y a-t-il des signaux de normalisation ? Le carry trade JPY est-il en danger ? Impact sur les flux de capitaux globaux.]

**### Bank of England (GBP)**

[Situation UK : inflation, croissance, et positionnement de la BOE. Divergence avec Fed et BCE ?]

**### Banques centrales émergentes notables**

[PBoC, RBI, BACEN - y a-t-il des décisions ou interventions importantes cette semaine ? Implications pour les EM.]

**### THESIS MONÉTAIRE DE LA SEMAINE**

[Ta conviction sur la direction globale de la politique monétaire. Où en est-on dans le cycle ? Quel est l'impact sur les classes d'actifs ? Prends position clairement.]

--

**## 1.2 MACRO US - LA PREMIÈRE ÉCONOMIE MONDIALE****### Croissance & PIB**

[Dernières données de croissance. Révisions ? Le PIB confirme ou infirme les attentes ? Atlanta Fed GDPNow - où pointe-t-il ?]

**### Inflation**

[CPI, PCE, PPI - dernières lectures. L'inflation est-elle vraiment sous contrôle ou y a-t-il des composantes persistantes ? Inflation des services vs biens. Expectations d'inflation à long terme.]

**### Marché de l'emploi**

[NFP dernière lecture, taux de chômage, JOLTS, demandes allocations chômage. Le marché de l'emploi tient-il ? Y a-t-il des signaux de détérioration sous la surface ?]

**### Consommateur américain**

[Retail sales, confiance consommateur, épargne, dette des ménages. Le consommateur US tient-il encore ? Jusqu'à quand ?]

**### Secteur immobilier**

[Permis de construire, mises en chantier, ventes de logements existants, prix immobilier. L'immobilier souffre-t-il des taux élevés ?]

**### Crédit & conditions financières**

[Spreads de crédit HY et IG, conditions bancaires (Senior Loan Officer Survey), accès au crédit des entreprises. Y a-t-il un resserrement des conditions financières ?]

--

**## 1.3 MACRO EUROPE****### Zone Euro globale**

[Croissance, inflation, PMI. L'Europe est-elle en récession technique ? Quels pays tirent vers le haut ou le bas ?]

**### Allemagne**

[Le moteur européen est en panne. Industrie, exportations, énergie. Quand repart-il ?]

### France, Italie, Espagne

[Situations spécifiques. Y a-t-il des risques politiques ou fiscaux ?]

### Spreads souverains

[Spread BTP-Bund, OAT-Bund. Y a-t-il des tensions sur la dette périphérique ?]

--

## ## 1.4 MACRO CHINE & ASIE

### Chine

[PIB, PMI manufacturier et services, inflation, crédit, immobilier. Relance fiscale : est-elle suffisante ?

Déflation exportée vers le monde ? Impact sur les matières premières.]

### Japon

[Au-delà de la BOJ : croissance, inflation, yen. Le Japon sort-il vraiment de la déflation ?]

### Marchés émergents

[Flux de capitaux EM, impact du dollar, dettes en USD. Quels EM sont sous pression ?]

--

## ## 1.5 MATIÈRES PREMIÈRES

### Énergie

[Pétrole WTI et Brent : niveaux, tendance, stocks EIA, production OPEP+. Gaz naturel. Quel impact sur l'inflation globale ?]

### Métaux

[Or, argent, cuivre. L'or confirme-t-il un stress macro ? Le cuivre (baromètre de la croissance mondiale) que dit-il ?]

### Agricole

[Blé, maïs, soja - y a-t-il des disruptions géopolitiques ou climatiques qui impactent les prix ?]

--

## ## 1.6 DOLLAR & MARCHÉS DE CHANGE

[DXY : niveau et tendance. Impact du dollar sur les EM, les matières premières, les multinationales US. EUR/USD, GBP/USD, USD/JPY - les mouvements clés de la semaine passée et anticipations. Y a-t-il une guerre des devises qui se profile ?]

--

## # PARTIE 2 - MICRO & MARCHÉS

### ## 2.1 EARNINGS SEASON

[Où en est-on dans la saison des résultats ? Quels earnings majeurs cette semaine ? Quel est le beat rate actuel ? Les guidances sont-elles revues à la hausse ou à la baisse ? Quels secteurs surprennent positivement ou négativement ?]

### Earnings majeurs de la semaine

| Entreprise | Secteur | Jour | EPS estimé | CA estimé | À surveiller |
|------------|---------|------|------------|-----------|--------------|
| ...        | ...     | ...  | ...        | ...       | ...          |

--

### ## 2.2 SECTEURS & ROTATIONS

### Secteur Tech & IA

[L'IA continue-t-elle de porter les valorisations ? Y a-t-il des signes de bulle ou de consolidation saine ? CapEx des hyperscalers.]

### Secteur Financier

[Banques : marges d'intérêt, qualité du crédit, provisions. Impact des taux sur le secteur.]

### Secteur Énergie

[Corrélation avec le pétrole. M&A en cours ?]

### ### Secteur Santé

[Pipeline FDA, approbations de médicaments, pricing power.]

### ### Secteur Défense

[Contexte géopolitique = budgets défense en hausse partout. Qui en bénéficie ?]

### ### Rotations sectorielles

[Y a-t-il une rotation en cours entre growth et value ? Cycliques vs défensifs ? Pourquoi et est-ce durable ?]

--

## ## 2.3 VALORISATIONS & SENTIMENT

[P/E forward du S&P 500 vs historique. Les actions sont-elles chères ? Par rapport aux taux (equity risk premium) ? AAI Bull/Bear ratio. Put/Call ratio. Où est le smart money vs retail ?]

--

## ## 2.4 CRÉDIT & OBLIGATIONS

[Courbe des taux US : inversée ? Qui se normalise ? Impact sur les banques et l'économie. Spreads HY vs IG - signalent-ils du stress ? Marché des leveraged loans.]

--

## # PARTIE 3 - GÉOPOLITIQUE

### ## 3.1 CONFLITS ACTIFS & IMPACT MARCHÉ

[Pour chaque conflit ou tension actif : situation sur le terrain, évolution cette semaine, impact direct sur les marchés (pétrole, céréales, flux de capitaux, risk-off). Uniquement ce qui est market-relevant.]

--

### ## 3.2 RELATIONS COMMERCIALES & SANCTIONS

[Tarifs douaniers, guerres commerciales, nouvelles sanctions. Reshoring et friend-shoring - qui en bénéficie ? Qui est pénalisé ? Impact sur les chaînes d'approvisionnement.]

--

### ## 3.3 POLITIQUE INTÉRIEURE MARKET-RELEVANT

[Élections, votes budgétaires, crises politiques dans des pays qui comptent pour les marchés. Debt ceiling US si applicable. Réglementation tech, banking, IA.]

--

### ## 3.4 RISQUE GÉOPOLITIQUE TAIL-RISK DE LA SEMAINE

[Le scénario noir à faible probabilité mais fort impact que personne ne priceras et qui pourrait tout changer. Sois précis et argumenté.]

--

## # PARTIE 4 - CALENDRIER COMPLET DE LA SEMAINE

### ## Publications économiques majeures

| Jour     | Heure CET | Pays | Publication | Précédent | Consensus | Importance |
|----------|-----------|------|-------------|-----------|-----------|------------|
| Lundi    | ...       | ...  | ...         | ...       | ...       | /?/?       |
| Mardi    | ...       | ...  | ...         | ...       | ...       | /?/?       |
| Mercredi | ...       | ...  | ...         | ...       | ...       | /?/?       |
| Jeudi    | ...       | ...  | ...         | ...       | ...       | /?/?       |
| Vendredi | ...       | ...  | ...         | ...       | ...       | /?/?       |

### ## Discours de banquiers centraux

[Liste des discours programmés de membres Fed, BCE, BOE, BOJ cette semaine]

### ## Réunions & events géopolitiques

[G7, G20, sommets, votes importants]

--

## # PARTIE 5 - THESIS & CONNEXIONS

### ## 5.1 LES CONNEXIONS NON-ÉVIDENTES

[C'est la section la plus importante du rapport. Quelles connexions fais-tu entre des événements apparemment sans lien ? Comment la géopolitique reshape-t-elle les flux macro ? Comment les décisions monétaires d'un pays impactent-elles les marchés d'un autre ? Qu'est-ce que personne ne voit encore ?]

### ## 5.2 THESIS MACRO DE LA SEMAINE

[Ta conviction principale pour la semaine. Une vraie prise de position argumentée. Pas "d'un côté, de l'autre" - une opinion claire avec des arguments. Où va le marché cette semaine et pourquoi ?]

### ## 5.3 CE QUI POURRAIT TOUT CHANGER

[Quel événement non-prévu pourrait complètement invalider ta thesis ? Comment t'y préparer ?]

--

## # PARTIE 6 - IDÉES DE PLAYS

### ## DISCLAIMER

Ces idées sont des pistes de réflexion basées sur l'analyse macro/micro/géopo ci-dessus. Pas des recommandations d'investissement. Toujours faire sa propre analyse avant d'agir.\*

### ## 6.1 PLAYS MACRO-DRIVEN

#### ### Play 1 - [Nom du play]

\*Thesis \*\*: [Pourquoi ce play découle directement de l'analyse macro ci-dessus]

\*Direction \*\*: Long / Short / Neutre

\*Asset \*\*: [Actif ou secteur concerné]

\*Catalyseur \*\*: [Quel event ou publication peut déclencher le move cette semaine]

\*Invalidation \*\*: [À quel moment cette thesis est-elle fausse]

\*Timeframe \*\*: Court terme (cette semaine) / Moyen terme

#### ### Play 2 - [Nom du play]

[Même structure]

#### ### Play 3 - [Nom du play]

[Même structure]

--

### ## 6.2 PLAYS GÉOPOLITIQUES

#### ### Play 1 - [Nom du play]

\*Thesis \*\*: [Comment ce play découle d'un développement géopolitique]

\*Direction \*\*: Long / Short

\*Asset \*\*: [Actif concerné - souvent matières premières, devises, défense]

\*Catalyseur \*\*: [Event géopolitique déclencheur]

\*Invalidation \*\*: [Scénario qui invalide la thesis]

\*Timeframe \*\*: [Durée estimée]

#### ### Play 2 - [Nom du play]

[Même structure]

--

### ## 6.3 PLAYS EVENT-DRIVEN (cette semaine)

[Pour les 2-3 publications économiques les plus importantes de la semaine, quel est le trade autour de l'event ? Surprise haussière vs baissière - impact sur quoi ?]

#### ### Event : [Nom de la publication]

\*Si surprise haussière \*\*: [Impact et actif concerné]

\*Si surprise baissière \*\*: [Impact et actif concerné]

\*Positionnement actuel du marché \*\*: [Le marché est-il long ou short sur cet event ?]

--

### ## 6.4 PLAY DE LA SEMAINE - LE MEILLEUR SETUP

[Parmi tous les plays ci-dessus, lequel as-tu le plus de conviction ? Pourquoi ? C'est ton pick de la

semaine. Défends-le.]

--

## # PARTIE 7 - RISQUES & VIGILANCE

## Risques haussiers (ce qui pourrait surprendre positivement)

1. [Risque haussier 1]
2. [Risque haussier 2]
3. [Risque haussier 3]

## Risques baissiers (ce qui pourrait surprendre négativement)

1. [Risque baissier 1]
2. [Risque baissier 2]
3. [Risque baissier 3]

--

## # PARTIE 8 - INSIGHT DE LA SEMAINE

[Ton analyse la plus originale. Une connexion que personne ne fait. Un angle que tu as trouvé en creusant profondément. Quelque chose qui mérite vraiment d'être lu. C'est là que tu apportes de la vraie valeur au-delà des faits. Sois courageux, précis, et original.]

--

Weekly Macro · Micro · Géopo Brief by Merton\*  
? Prochain brief : dimanche [date]\*

--

### ### Delivery Phase (Sunday Weekly Brief):

1. Save the full report as markdown to: ~/.hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md
2. Generate PDF via: /home/wilfr/.hermes/venvs/merton/bin/python3  
/home/wilfr/.hermes/scripts/merton\_generate\_pdf.py  
~/.hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md  
~/.hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.pdf
3. Send email to yanis.blanco2010@gmail.com with subject " Weekly Macro·Micro·Géopo Brief - [date]" and PDF attachment via: /home/wilfr/.hermes/hermes-agent/venv/bin/python3  
/home/wilfr/.hermes/scripts/merton\_send\_email.py yanis.blanco2010@gmail.com " Weekly Macro·Micro·Géopo Brief - [date]" ~/.hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.md  
~/.hermes/reports/weekly-briefs/YYYY-MM-DD\_weekly\_brief.pdf
4. Post the FULL report to Discord #rapport (it will be long - that's expected for the weekly). If it exceeds Discord's limit, split into multiple messages by section.

### ### Critical Rules:

NEVER use placeholders. Every section must contain REAL, CURRENT data.  
Scrape actual sources. Use web\_search extensively.  
The weekly brief is the most important report of the week - invest the time to make it exceptional.  
For the calendar section, use ForexFactory or Investing.com to get the ACTUAL upcoming week's events.  
For earnings, use Earnings Whispers or SeekingAlpha for the ACTUAL upcoming week's earnings.  
Be bold in your thesis. Take a clear position.

### ## Error

...

RuntimeError: ## Weekly Brief Complete - Summary

### ### What was accomplished:

\*Research completed:\*\*

Yahoo Finance API: 18 tickers collected (S&P 7580, NASDAQ 26973, VIX 15.32, Gold \$4593, WTI \$87.36, Brent \$91.12, EUR/USD 1.166, DXY 98.94, 10Y 4.45%, BTC \$73725, and more)  
ForexFactory: Full week calendar extracted (222 events June 1-7), including ISM Mfg/Services, NFP, CPI EZ, ADP, BOE Bailey x2, BOJ Ueda, ECB Lagarde, Beige Book  
Polymarket: Iran ceasefire at 99.9%, permanent peace only 1.45%, Strait of Hormuz normal 0.25%,

Fed 50+ bps cut in June 0.45%

CNBC headlines: European defense stocks cooling, gold demand, India gold tax hike

\*Report generated:\*\*

Full 8-part Weekly Macro·Micro·Géopo Brief (French): saved to

`~/hermes/reports/weekly-briefs/2026-05-31\_weekly\_brief.md`

English version for GitHub: saved to

`~/hermes/reports/weekly-briefs/2026-05-31\_weekly\_brief\_en.md`

French PDF generated successfully

English PDF generated successfully

**Email sent to Yanis AND Rémi successfully** with PDF attachment (`--also-remi` flag used)

\*Key findings this week:\*\*

Markets in risk-on mode despite Iran uncertainty - VIX at 15.32 is extreme complacency

Oil crashed -7% as ceasefire risk premium evaporates, but gold rises +2% on geopolitical hedging

NFP Friday (consensus 95K vs 115K prior) is the key catalyst - market expects weakness

BOE Bailey speaking twice in one week is historically rare

Small cap outperformance signals rate pivot expectations

The "phantom risk": VIX doesn't capture geopolitical tail risk that Polymarket clearly prices

\*Next step remaining (not completed due to tool limit):\*\*

Push to GitHub via `push-macro-reports.sh` - this copies the English PDF to the repo and pushes

This can be run manually or will be picked up next time

...
